Australian Systematic Botany

Australian Systematic Botany is a new journal devoted to the systematic botany of the Australian region in both theory and practice. Papers on all plant groups, including fossil plants, are considered. Papers may be of universal interest or specifically relevant to Australia and biogeographically related areas.This journal publishes the taxonomic papers previously published in *Australian Journal of Botany*. Types of papers published include research papers, review articles, comments on previously published papers, and 'viewpoint' articles. Send manuscripts to the Managing Editor, *Australian Systematic Botany*, 314 Albert Street, East Melbourne, Victoria 3002, Australia. Notice to Authors is published in the first issue of each volume. Copies are available on request. Published four times a year. No page charges.
